

PRO-LM-LED-FLUO

Fluorescence LED Light Source

PRO-LM-LED-FLUO illuminator with PR-LC22 control unit

Modern source of excitation illumination which offers following advantages compared to standard lamps:

- lifetime over 20 000 hours;
- low power consumption and heat generation;
- smooth intensity adjustment;
- possibility of PC control via USB interface.

Following variants are available:

- blue (FITC),
- green (TRITC),
- UV 356nm, UV 400nm (DAPI).

Compatibility with existing fluorescence illuminators for following microscopes:

- OLYMPUS® BX, CX, CKX series.

OLYMPUS® is a registered trade mark of OLYMPUS Corp.
