

# PRO-LM-LED

## High Intensity LED Illuminator for Optical Microscopes

PRO-LM-LED illuminator with PR-LC22 control unit

### Functions Overview:

- 10W high intensity LED light source – neutral white;
- mounting instead of a halogen lamp;
- constant color temperature at the whole illumination range (no need to use daylight filter);
- low power consumption and heat generation;
- lifetime over 20 000 hours;
- possibility of PC control via USB interface.

### Compatible Microscopes:

- OLYMPUS® BX41, CKX;
- OLYMPUS® BX51/BX53 using PRO-LM-LEDAD optical adapter.

OLYMPUS® is a registered trade mark of OLYMPUS Corp.
